Math4Life-

West Virginia's math4Life initiative is a statewide effort to improve student mathematics performance. The WVDE seeks to work with counties and schools throughout the state to institute best practices, challenging pedagogy, and student engagement strategies to improve students' mathematics achievement. The math4life statewide plan is designed around a statewide leadership team that works collaboratively to create a system of mathematical improvement from the state level to the district level to the school level and, ultimately, to the student level.

Unite with Numeracy

This initiative unites educators, families, and students while enhancing teacher content knowledge, implementing research-based instructional practices, increasing student achievement and engagement, and providing students with the essential tools they need to be successful mathematicians.

Mathematical Habits of Mind

The Mathematical Habits of Mind (MHM) are an integral part of the College- and Career-Readiness Standards for Mathematics. The Mathematical Habits of mind are the skills and dispositions students need developed in their PK-12 education. The follow documents examine each of the Mathematical Habits of Mind in depth.
